

PRIMED Banner Authors List

The PRIMED Consortium banner, “Polygenic Risk Methods in Diverse Populations (PRIMED) Consortium”, is used to acknowledge PRIMED core members who contributed to the overall conduct of PRIMED but do not otherwise meet criteria for byline authorship for a given manuscript (see “Collaboration and authorship” in the [PRIMED Publications Policy](#)). The Consortium banner author should be included on any publication that makes use of Consortium products or resources (e.g. AnVIL workspaces, harmonized datasets, etc.).

PRIMED Principal Investigators (for Study Sites and the CC) and Program Directors (for NIH) determine who of the core members affiliated with their group should be on the banner author list and communicate that list (along with any update or changes) [to the CC](#).

You may download this list as a .csv using the button at the bottom or a .pdf by using the link at the top of this list. This list of members of the banner gets updated frequently, so please be sure you have the current version.

External tools such as the [NCI Author Arranger](#) can be used to help convert the banner author list into journal-specified formats.

Name	Study Site or Center	Institution(s)	Location
Clement Adebamowo	CARDINAL	University of Maryland Baltimore	Baltimore, MD 21201 US
