PRIMED Eligibility List

The PRIMED *Eligibility List (EL)* below is the list of investigators eligible to enter into PRIMED Consortium-wide data sharing mechanisms (e.g., eligible to submit a PRIMED Coordinated dbGaP application or eligible to be an investigator REPRESENTATIVE signing the PRIMED Consortium Data Sharing Agreement, CDSA). Note that EL members do not gain access to Consortium datasets until they are approved via the relevant data access mechanism (e.g., DACs have approved relevant Data Access Requests on a PRIMED coordinated dbGaP application, or a signed and executed CDSA has been submitted to the Coordinating Center).

For PRIMED Coordinated dbGaP applications, the EL doubly serves as the External Collaborators List, to be appended to PRIMED Coordinated dbGaP applications in lieu of manually inputting names and institutions for collaborator applicants from other institutions (as described in the Instructions for PRIMED Coordinated dbGaP Applications). A list of dbGaP project applicants who have submitted PRIMED Coordinated dbGaP applications and informed the CC is tracked on the dbGaP application records webpage. Only those applicants who have informed the CC (i.e. appear on the records webpage) *and* who have an approved DAR to a given dataset will have access to that dataset in the PRIMED Coordinated dbGaP data sharing circle.

For the PRIMED CDSA, the CDSA records webpage maintains lists of investigator representatives and studies/cohorts who have signed, users who have data access, and AnVIL workspaces containing PRIMED CDSA data.
