PRIMED: Advances in Polygenic Risk Score Research

December 9, 2026
1:00 - 5:00 pm Eastern Time

Join the NIH-funded Polygenic Risk Methods Development (PRIMED) Consortium for an afternoon of research highlights, discoveries, and successes from the last 5+ years of collaborative consortium research.

Topics will include

- Disease-specific advances in cancer, diabetes, and heart disease
- Methodological innovation
- Cloud-based tools and resources
- A panel discussion on future directions

Open to the public!
Please **register in advance** for this meeting by Friday, December 4.

Connect with PRIMED

Gather diverse datasets

Develop new PRS methods

Foster global collaboration

*The PRIMED Consortium is developing and evaluating methods to improve the use of polygenic risk scores (PRS) to predict disease and health outcomes in diverse ancestry populations. For background on PRS, visit our **Education resources**.*
